CARE
Center for Academic Resource in Engineering

Program Coordinator
Dana Tempel
CARE enhances the learning experience for all undergraduate engineering students through academic support, enhancing collaborative learning opportunities, and providing positive influence through peer mentoring.
Space

Located on the entire 4th fl of Grainger Engineering Library, available 24 hours a day most days

- 136 individual study carrel’s
- 14 group study rooms
- >35 open tables
- 36 computer work stations
- 2 collaboration tables
Programs

- Tutoring & Peer Advising - 7 days a week
- Students Helping Students (SHS) - Study Sessions
- Workshops
- Facilitated Study Groups
- Exam Review Sessions
Message to students

- Learning happens here
- You are welcomed and expected to use this space
- You will find guidance here
- When you are admitted to engineering it is expected you will come here and give your studies 110% and you can expect the same from us
What do students say about CARE?

Entering into The College of Engineering my freshman year, I feared that such a prestigious and vast academic program would overwhelm me. Within CARE, I always find exactly what I need to succeed, whether it is one on one attention, group learning, or just an ideal place to study. CARE has made a huge impact in my studies, as well as helped me form strong friendships with other engineering students who have the same drive and motivation to achieve the impossible.
